

ARTHUR BECHTEL

Classic Motors

POST SEASON CHECKLIST

- Use a battery disconnect switch and permanently connect a trickle charger directly to the battery
- After the final shutdown, the exhaust should be plugged with a cloth soaked in oil
- We recommend covering the vehicle. Also available from us:
Our Arthur Bechtel Classic Motors-Car Cover, which is made of a fleece polyester fabric that is absolutely breathable, moisture-transporting, highly water-repellent and roughened on the inside so that even „larger“ dust particles do not have a chance to scratch your vehicle. The car covers can be specially made for individual models and therefore they fit perfectly on the vehicle
- Please ensure that your vehicle is parked at a constant room temperature and regulated humidity of 40-60% - to protect the components and against expensive follow-up costs
- If you take your vehicle out of service, it is important that it is also insured under a building insurance. We also recommend a vehicle stand insurance, which can be taken out together with a comprehensive insurance
